

WE ARE LOOKING FOR A

Software Project Manager (Dutch speaking)

BELGIUM

TenForce is a software company based in Leuven, Belgium, and part of Elisa IndustriQ – a Finnish group committed to making intelligent manufacturing happen. We are experts in EHSQ and Operational Risk Management software,

Industry leaders and governmental organizations use our products worldwide: INEOS, TOTAL, Friesland Campina, ABInBev, Chevron Philips Chemicals, Proximus, Telenet, Fluvius, the Flemish, and the Walloon Government – just to name a few. We like to try a fresh approach, be quick on our feet, and delight our customers.

We are looking for a fellow Software Project Manager, who will be responsible for managing projects from initiation to completion. You will be working together with your TenForce colleagues, and be a true sparring partner for our customers.

Your role:

- Responsible for planning out the complete blueprint of your projects; managing the software project from A-Z
- From analysis to writing user stories, specifications & defining features of the customer requests, your hands-on approach is your biggest driver
- Untangle complex business processes and propose creative solutions in our flexible platform
- You manage multiple projects in parallel
- Ensuring projects are delivered within time, scope, budget and quality according to our internal TenForce project planning & process
- Delivering completed software products to customers and checking regularly on the product's performance
- Managing relationships with your customers and stakeholders

Who are we looking for:

- Somebody living in Belgium, fluent in spoken and written Dutch and English, French is a strong plus.
- You're interested in business processes and passionate about software products to create added value for the customers
- Short deadlines and multiple changes are within your comfort zone
- You know how to manage expectations of the customer to deliver your project in time and in budget by collaborating with your colleagues (analysts, other project managers, engineers ...)
- Knowledge & hands-on experience with functional analysis
- A positive attitude blended with a solution-focused mindset is your magical recipe for success – a mild level of craziness is always nice to have
- You have an affinity with or a background in engineering
- 1-5 years experience in project management in a customer-oriented organization.

What's in it for you:

- Trust, flexibility and autonomy to manage your projects whilst being supported by us when needed
- A dynamic environment that combines intrapreneurship with professionalism
- Expanding your horizon by working with a variety of customers and business domains
- Our main office is based in lovely Leuven, 1 minute away from the train station and close to lively student community ... but you can also work remotely when you prefer
- You'll join a dynamic, international, multicultural team that loves solving challenges through an unconventional and pragmatic approach but doesn't tolerate breaking the boundaries of trust, mutual respect, diversity, inclusion, and team-player spirit.

Reference: #136

In September 2021, TenForce joined forces with Elisa IndustrIQ – a Finnish group of companies committed to making intelligent manufacturing happen. You'll be an essential part of our journey to becoming a global, innovative leader in Process Safety software for manufacturing and high-risk industries.

We hope you'll be the next one to join our team!
